

“The Green Vision Education Program is a natural extension of the environmental science units we have in our curriculum. The title itself encompasses the philosophy of this program: Learning how to make our school and our community a more environmentally friendly place now and for the future. Our students, staff, and parents had fun achieving this award and look forward to getting our next awards!”

Brenda Mitchell, Principal
Marshall Elementary School
Dubuque, Iowa

How can your school become a Green Vision Education School?

The Dubuque Metropolitan Area Solid Waste Agency's Green Vision Education Award recognizes schools for their efforts in sustainable natural resource management and pollution prevention in the school and community environment.

Classroom practices, buildings and grounds maintenance, and curriculum are all evaluated and suggestions are then made by the Green Vision Team toward advancing environmental stewardship. Schools achieving program standards receive Green Vision Education flags to hang outside and banners to display inside their buildings.

Help us to improve our neighborhoods by minimizing waste, preventing pollution, reducing litter, and conserving natural resources.

Dubuque Metropolitan Area Solid Waste Agency (DMASWA) is committed to pollution prevention and sustainable development by conserving natural resources through reducing, reusing and recycling.
